Dr. Ioannis Glavas is an internationally recognized oculofacial plastic surgeon and the founder of The Glavas Center, with offices on Newbury Street in Boston and the Cummings Center in Beverly. Board-certified in ophthalmology, and considered THE eyelid specialist, Dr. Glavas has been recognized for more than 10 years as a top doctor in the Boston and North Shore areas by Castle Connolly's America's Top Doctors. He also has more than 20 years of clinical and academic experience in eyelid aesthetic rejuvenation and has written a number of publications and book chapters in his field.

Dr. Glavas is one of the few doctors in the United States using a laser to remove lower lid bags without an incision or scar. He calls it the "No Scar Lower Lid Lift." The procedures he offers have been scientifically established for their safety and effectiveness. It is quite common for Dr. Glavas' patients to say, "That was much easier than I expected!" after their eyelid lift procedure. Says one satisfied patient, "He spent the time to take away my nervousness during my consultation. I highly recommend him!" Dr. Glavas is an expert in plastic surgery and non-surgical rejuvenation of the eyelids.
